

## Product Sheet OrganoWood® Cleaner 03

### Product Description

OrganoWood® Cleaner 03 is an environmentally labelled detergent made for cleaning of wooden floors outside. The product is fattening. It gives extra protection to the wood and a pleasant wood surface. OrganoWood® Cleaner 03 may be used both as General detergent for lightly grimed surfaces and as Intense detergent for strongly grimed surfaces.

### Usage

General detergent: 1 dl OrganoWood® Cleaner 03 is mixed in 5 liters of lukewarm water.

Intense detergent: 2 dl OrganoWood® Cleaner 03 is mixed in 5 liters of lukewarm water.

### Treatment Instructions

Vacuum or alternatively brush the floor carefully. Dilute OrganoWood® Cleaner 03 according to the instructions for General detergent or Intense detergent depending on how dirty the floor is. Clean the floor with the diluted detergent using a cloth or mop. The product may be used in combination with high pressure wash, but this is not to recommend since it may wear the wood. Let the floor air-dry without rinsing. When the floor is completely dry it may be used again.

For floors that previously have been treated with OrganoWood® Care 02 or wood which has been bought as OrganoWood® Premium, post-treatment with OrganoWood® Care 02 is required to restore the water repellence of the wood.

### QUICK FACTS
