

## The greying process of OrganoWood® timber over 1 year

Timber that is placed outdoors turns grey naturally but the greying process can appear differently during the seasons and depending on the weather conditions.

In some cases the greying may initially be perceived as speckled or as dark spots/fields, but this evens out relatively quickly. After about 1 year an OrganoWood® timber that is placed outdoors in direct sunlight already has a grey hue.

In shadow this may take longer, but the end result is the same.

Wood installed horizontally often has a faster greying process than wood installed vertically
