

## 03. CLEANER

The information in this product datasheet includes guidelines for OrganoWood® 03. Cleaner that comes from safety datasheets, OrganoWood AB's test results and collected experiences about the product. OrganoWood AB does not take any responsibility for incorrect use of the product. The latest version of this product datasheet is available on OrganoWood AB's website: [www.organowood.com](http://www.organowood.com).

**Product description**

OrganoWood® 03. Cleaner is a water based super concentrate that is used to clean light and heavily soiled wood surfaces outdoors.

**Environment**

OrganoWood® 03. Cleaner contains only substances that can be returned to the natural cycle. The product is ecolabelled "Good Environmental Choice", environmentally classified B by SundaHus and recommended by Byggvarubedömningen and BASTA. All substances in the product are classified as harmless for the environment according to the Swedish National Chemicals Inspectorate.

**Consumption**

All-purpose cleaning: 1 dl OrganoWood® 03. mixed with 5 litres of tepid water.

Coarse cleaning: 2 dl OrganoWood® 03. mixed with 5 litres of tepid water.

**Proceed as follows**

Brush off any loose dirt from the surface of the wood. Dilute OrganoWood® 03. according to the instructions for all-purpose cleaning or coarse cleaning depending on how soiled the wood is. Clean with diluted cleaning agent by using a scrubbing brush, cloth, mop or the like. The product must not be used together with a high-pressure washer, as the high-pressure washer can wear away the fibre of the wood. Finish by rinsing carefully with water. Allow the wood to dry. After coarse cleaning of the timber we recommend after-treatment with OrganoWood® 02. Repellent: Dirt and water repellent to completely restore the water repellent properties of the wood surface.

The product should be stored in a sealed container at 10–30°C and is then stable for at two years. Old liquid should be handed in at the nearest recycling station.
